PROFESSIONAL PROFILE

Full-Stack Web Developer with MCA (2024-2026) experienced in building responsive, database-driven web applications using Python, Flask, FastAPI, MySQL and JavaScript. Independently built a role-based Student Hostel Management System, a task management app with a FastAPI REST API, and an Online Voting System. Contributed to a team-built AI customer-feedback platform. Seeking a Full-Stack or Frontend Web Developer role to grow and contribute production-level skills.

INTERNSHIP

Full Stack Development Internship | e-Soft Solutions, Trichy | June 2025

Completed hands-on training in Python, Flask, MySQL and modern JavaScript. Built full-stack mini-projects integrating a Flask back end with MySQL. Developed responsive layouts using HTML5, CSS3 and ES6+ JavaScript.

KEY PROJECTS

TaskFlow - Task Management Application

- **Tech Stack:** Python, FastAPI, REST API
- Built a task management application with a FastAPI back end to create, organise and track tasks through a clean REST API.
- Applied REST API design with Python and FastAPI to structure task operations as clear, reusable endpoints.

Student Hostel Management System | MCA Academic Project

- **Tech Stack:** Python, Flask, MySQL, PyMySQL, Jinja2, HTML5, CSS3, JavaScript
- Developed a web-based Hostel Management System to manage room allocation, complaints and fee management.
- Implemented role-based modules for Admin, Warden and Student on a three-tier architecture, organised into six modules (Authentication, Admin, Warden, Student, Complaint, Notification).
- Built a leave request module and iteratively tested, debugged and refined features during development.

Online Voting System

- **Tech Stack:** PHP, MySQL, HTML, CSS
- Built a web-based voting system with email-based voter authentication and a one-vote-per-user policy.
- Ensured data integrity with duplicate-vote prevention; implemented dynamic candidate listing and real-time vote count display.
- Designed a MySQL database with voters and candidates tables to store and tally votes.

Project LOOP - AI Customer Feedback Platform | Zidio Internship Team Project

- **Tech Stack:** Next.js 14, TypeScript, PostgreSQL, Claude AI
- Contributed to a team-built AI-powered customer-feedback intelligence platform during a 4-week project build.
- Collaborated with the team through a shared GitHub repository.

TECHNICAL SKILLS

Languages: Python, JavaScript (ES6+), HTML5, CSS3

Frontend: HTML5, CSS3, JavaScript, Jinja2, Responsive Web Design

Backend: Python, Flask, FastAPI, REST APIs, JWT Authentication, PHP

Database & Testing: MySQL, SQLAlchemy, SQLite, Pytest

Tools & Platforms: VS Code, Git, GitHub, AI-Assisted Coding (Claude, OpenAI Codex)

Core Competencies: Full-Stack Web Development, Role-Based Access Control, Database Management, Problem Solving, Adaptability, Leadership, Time Management

CERTIFICATIONS

- 30 Days MasterClass in Full Stack Development - NoviTech R&D Pvt Ltd (Jan-Feb 2026), ID: NT_B57FSDET303
- Python Programming (Basic) - Vivekananda College of Arts and Science for Women (Aug-Nov 2022)

EDUCATION

Master of Computer Applications (MCA) | Annamalai University, Chidambaram | 2024-2026 | CGPA: 8.0

Bachelor of Computer Applications (BCA) | Vivekananda College of Arts and Science for Women, Sirkali | 2020-2023 | CGPA: 8.94

HSC | Best Matriculation Higher Secondary School, Sirkali | 2019-2020 | 78%

SSLC | S.M.H Matriculation School, Sirkali | 88.6%
